

# Safety Warnings

## ATX Power Supply

- Your adaptor is not a toy. Keep it away from children. Make sure that all persons who operate your adaptor read and follow this guide.
- Using your adaptor with non-approved accessories may result in serious fatal injury and/or property damage.
- Your adaptor is suitable for use only with designated product. Do not use your adaptor with other electronic devices. It may result in serious injury and/or property damage.
- For energy saving and safety, disconnect the input power to your adaptor when it is not in use.
- Your adaptor may become hot during operation. Ensure to provide ventilation and refrain from placing items on or around your adaptor during operation.
- The wall socket outlet must be located near the device and should be easily accessible.
- Before use, make sure that your designated product's input voltage is compatible with the output voltage of this adaptor.
- Keep your adaptor dry. Direct contact of your adaptor to moisture may lead to electrical shock, causing serious fatal injury and/or property damage. Consult a qualified technician for a complete safety evaluation before resuming use of your adaptor when it has come into direct contact with moisture.
- Inspect your adaptor and cables for damage and wear before use. Do not use or attempt to repair your adaptor and/or cables. Consult a qualified technician for a complete safety evaluation if in doubt.
-  This equipment is a Class II or double insulated electrical appliance. It has been designed in such a way that it does not require a safety connection to electrical earth.
-  AC voltage: This symbol indicates that the rated voltage marked with the symbol is AC voltage.
-  DC voltage: This symbol indicates that the rated voltage marked with the symbol is DC voltage.

-  The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the unit's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.
-  The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the manual accompanying the unit.

The symbol on the product or its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment

by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

For more information about where you can drop off your waste for recycling, please contact your local authority, or where you purchased your product.
